

CT Meter

For AC Current Measurement When Using Current Transformers

Easy to Use. Easy to Read.

Featuring an acclaimed easy-to-read display, combined with easy-to-use programming software and a high resolution input, the CT Meter is the newest addition to the Advanced Panel Meter (APM) product group to measure current.

The CT Meter is designed specifically for use with current transformers. When used with an external current transformer, it can accurately measure up to 10,000 amps. The CT Meter also provides a range of features, such as alarm set-points and three-color dynamic backlighting.

The customizable four-character message display and scalability enable users to tailor the meter to display critical parameters to their desired specifications. The set-points, coupled with the backlighting allows operators to be visually alerted when a parameter is out of range. The two outputs can be used to connect the APM to other systems in the process.

Key Features

Large multi-format display that incorporates:

- · 40 segment bar graph display
- · Large 4-digit display
- Separate Starburst display area for annunciators, custom messages and alarm information
- · Dynamic backlight color

Programmable:

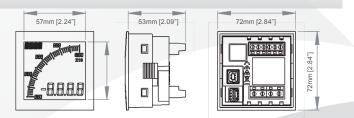

- Display Range (Both Min & Max Values)
- · Custom annunciators
- · User-selectable backlight color and intensity
- Two independent alarm set-points
- · Two independent outputs
- 4-20mA analog monitor output
